ABOUT ME

I am an enthusiastic and detail-oriented Software Developer passionate about building efficient, scalable, and user-friendly applications. I have a strong foundation in Java, SQL, and web technologies, with hands-on experience developing projects like Rock Paper Scissor Game. I'm eager to contribute to real-world software solutions while continuously learning new tools and frameworks to enhance my skills.

EDUCATION

Government Polytechnic College | 2021-2024

Diploma in Electronics and Communication Engineering

Diploma graduate in Electronics and Communication Engineering from Government Polytechnic College with **77% (First Class)**. I have developed a strong interest in software development.

Einstein College of Engineering | 2024-2027

Electronics and Communication Engineering

Currently pursuing a Bachelor's degree in Electronics and Communication Engineering at Einstein College of Engineering with a current **CGPA of 7.7** upto the 5th semester. Maintaining academic excellence with Distinction.

PROJECT

AI-Powered Email Reply Generator

Built an AI-powered Email Reply Generator using Java, Spring Boot, React, and Gemini API to generate tone-based email responses with dynamic prompt generation, secure API integration, and responsive UI design.

Hospital Management System

Designed and developed a role-based Hospital Management System using Java, MySQL, and JDBC with modules for patient registration, appointment scheduling, doctor management, and efficient CRUD operations.

Password Generator

Developed a Java-based Password Generator application to create secure random passwords with customizable uppercase, lowercase, numeric, and special character options.
